Portfolio: tejassharma.in Github: github.com/tejassharma-ts Mobile: +91-6398284253

Front-end developer with **~3 years of experience** in React, Next.js, and TypeScript. Built a production HRMS platform 0-to-1 as sole front-end engineer, and shipped a client-approved access system that helped Trackier close deals with ICICI Bank and SBI.

Experience

Trackier (AppTrove) On-site, Noida
Front-end Developer (Full-time) *March 2025 – Present*

- **Secure Admin Access Flow:** Designed and shipped a **client-approved access system** for internal admin logins: admins request access, clients approve or decline from their dashboard, every request is logged, and declined requests are locked out for 48 hours. A hard security requirement that **helped close deals with ICICI Bank and SBI**, now standard in new banking deals (e.g., Axis Bank).
- **Cohort Report Feature:** Built a **client-facing cohort retention report** from scratch, with a cohort table, retention heatmap, and date filters, giving clients a self-serve view of retention trends that previously required manual data exports from the backend team.
- **SDK Developer Docs:** Authored MMP SDK integration docs that made **client integration self-serve**, eliminating the routine onboarding calls the Android team previously held with every new client; Android engineers are now pulled in only for rare initial-integration issues.
- **TypeScript Migration: Single-handedly migrated** a production codebase from JavaScript to TypeScript over 4 months, surfacing and fixing latent type bugs along the way without disrupting ongoing feature work.
- **Internal UI Library:** Contributed 10+ reusable React + ReactStrap + SCSS components, including data tables, date-range pickers, and multi-select dropdowns, to a shared library **used across Trackier, Affnook, and CSNook**, removing duplicate UI code across all three products.

Kaliper Remote
React / Next.js Developer · Sole front-end engineer *Nov 2023 – March 2025*

- **0-to-1 HRMS Platform:** Built an HR management web app for a Kaliper client **from scratch as sole front-end engineer** (Next.js, TanStack Query, Zustand, Tailwind CSS), covering payroll, employee records, attendance, leave management, and onboarding, and took it to **first production release in ~6 months**. Worked directly with the client, an HR professional, to translate complex salary-calculation rules into a clear payroll UI.
- **Data Fetching & Caching:** Designed the app's TanStack Query caching strategy (tuned stale times, prefetching on navigation, and request deduplication across components) so **revisited pages load instantly from cache** and data-heavy screens avoid redundant API calls.

Projects

Diamond Valley | **diamondvalley.in**
Freelance · E-commerce · Production client

- **Tech Stack:** React, Zustand, Tailwind CSS, Framer Motion, Zod
- **Convention-Based Image Loading:** Designed an **S3 path convention** keyed by jewelry, stone, and metal type, so product images resolve directly on the client when a shopper switches variants, **eliminating the API call previously made on every selection**.
- **URL-Synced Product Filtering:** Built a filtering system that keeps Zustand state in sync with URL parameters, so every filtered product view **can be shared as a link** and survives page refresh.

Pastor & Co | **pastorandco.com**
Freelance · E-commerce · Migrated client from Shopify to a custom-built storefront

- **Tech Stack:** React, Tailwind CSS, Zustand, Radix UI
- **Admin Dashboard:** Built a **custom admin panel with drag-and-drop media management to replace Shopify's admin**, so the client could manage products and images in the workflow he already knew.
- **Multi-Currency & Filtering:** Added **multi-currency pricing** so international shoppers see prices in their own currency, plus URL-synced product filtering for shareable search results.

Skills

- **Languages:** TypeScript, JavaScript
- **Frameworks & Libraries:** React, Next.js, TanStack Query, Zustand, Redux, Framer Motion
- **Styling & UI:** Tailwind CSS, SCSS/Sass, CSS Modules, Radix UI, MUI, ReactStrap
- **Testing:** Jest, Cypress

Education

Himalayan Institute of Technology Dehradun, India
Bachelor of Computer Applications (BCA) *July 2021 – June 2024*
